Market Dynamics

The increasing rate of joint pain like wrist, knee, arthritis problem, ulcerative colitis, and lupus is primarily driving the market growth. A wide range of cortisone applications in various diseases is again propelling the demand. High prevalence of chronic diseases like diabetes and obesity is further accelerating market growth. On the other hand, usage of cortisone steroids or supplements may have some side effects like dizziness, headache, menstrual changes or allergic to some people, which is expected to hamper the market growth. Whereas, the increasing incidence of allergic disorders and breathing disorders is likely to provide potential opportunities over the forecast period.

The report covers Porter's Five Forces Model, Market Attractiveness Analysis and Value Chain analysis. These tools help to get a clear picture of the industry's structure and evaluate the competition attractiveness at a global level.

Additionally, these tools also give inclusive assessment of each application/product segment in the global market of cortisone.
